# New Hebrides

OFFICIAL STANDARD NAMES

approved by the

UNITED STATES BOARD ON GEOGRAPHIC NAMES

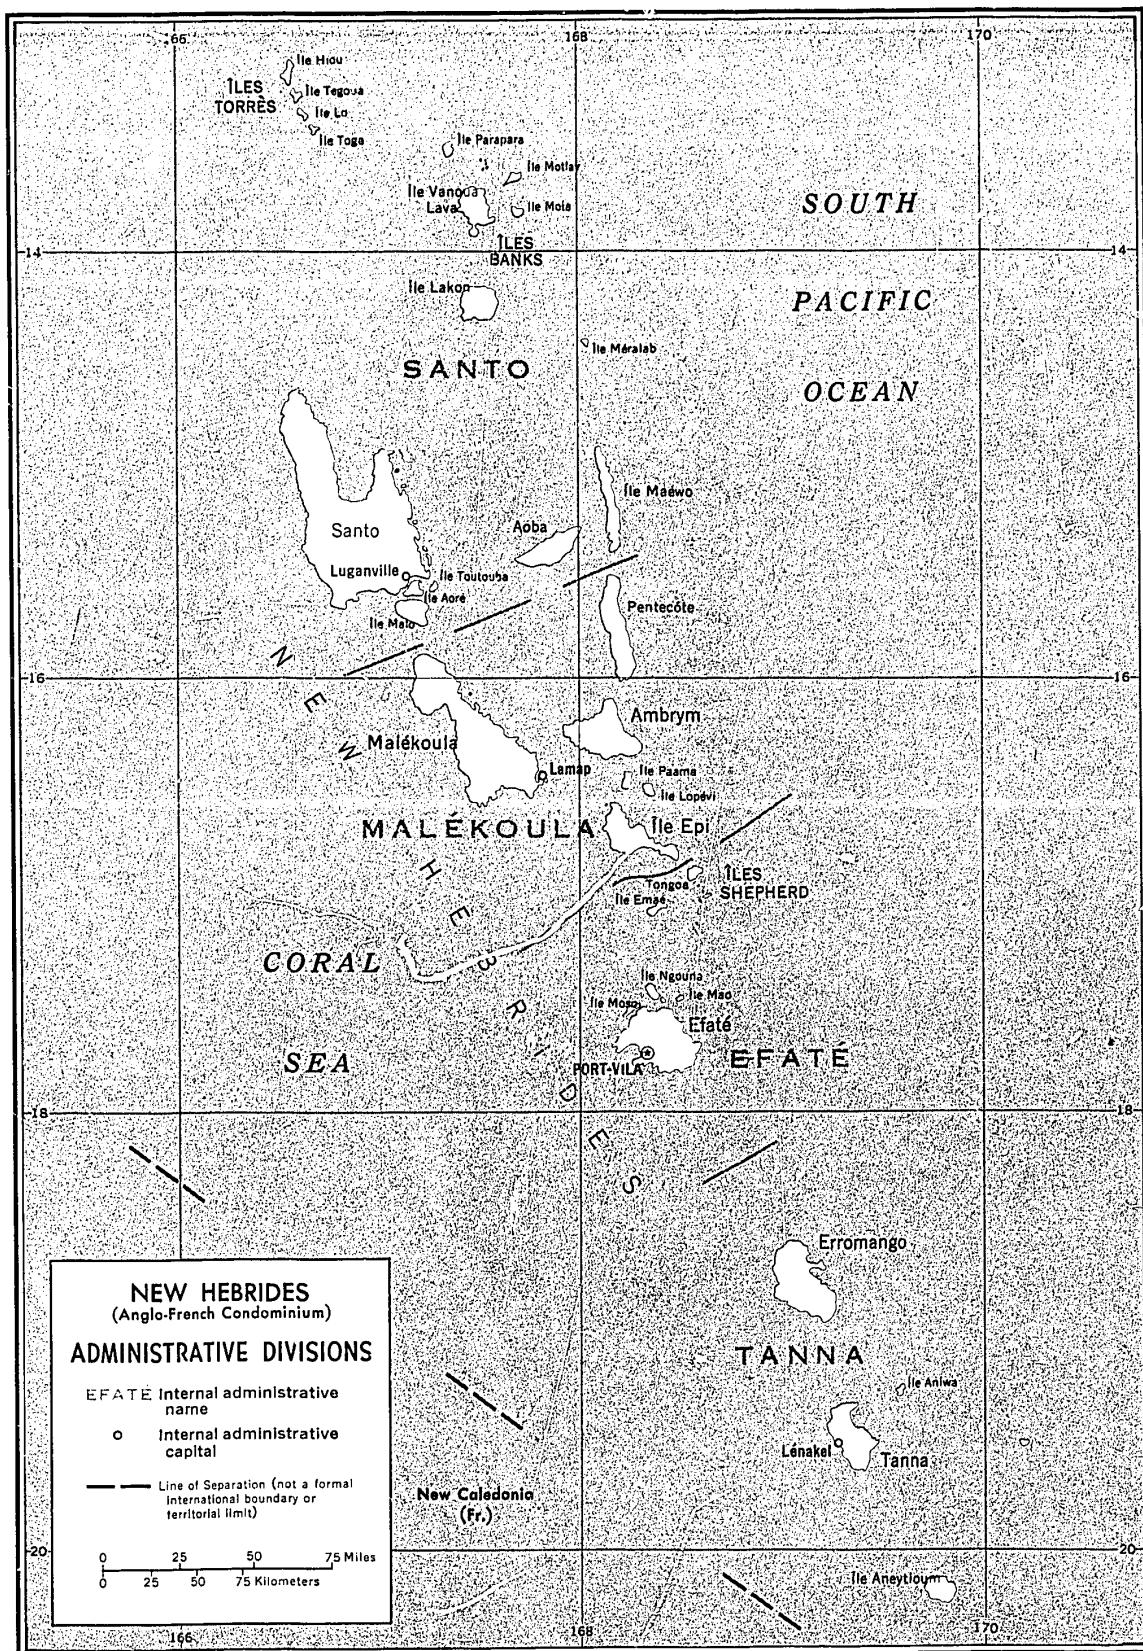

Prepared by the

Defense Mapping Agency Topographic Center

Washington, D. C. 20315, May 1974

---

---

## FOR E W O R D

This gazetteer contains about 4,500 entries for places and features in the Anglo-French New Hebrides Condominium located in the southwestern part of the Pacific Ocean.

The locational map (opposite) delineates the area covered by this gazetteer.

The names in this gazetteer supersede those in all previous Board lists for the area concerned.

The entries in this gazetteer include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

Entries include the names of first-order administrative divisions, populated places of various sizes, other cultural entities, and a diversity of topographic and hydrographic features. Undersea features which lie wholly or partly outside territorial waters are also included in this gazetteer. The names of such features are spelled in the form approved by the U.S. Board on Geographic Names (BGN) and the Secretary of the Interior on the recommendation of the BGN Advisory Committee on Undersea Features.

The basic name coverage corresponds to that of maps at the scale of 1:100,000; however, for some areas the names density is based upon 1:50,000 scale coverage.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one of the following sources:

1. *Carte de la Mélanésie au 1:100,000, Archipel des*

*Nouvelles Hébrides*, compiled and published by the Institut Géographique National, Paris. Some sheets have UTM grid overprint and English marginal notes, but no names or name changes, added by the Director of Military Survey, Ministry of Defence, United Kingdom, 1960-71.

2. *Carte de la Mélanésie au 1:50,000, Archipel des Nouvelles Hébrides*, Institut Géographique National, Paris, 1968-69.
3. *New Hebrides Condominium*, Directorate of Overseas Surveys, U.K., 1971; scale: c. 1:4,000,000
4. *Joint Operations Graphic-Ground*, Prepared under the direction of the Department of Defense and published by the Aeronautical Chart and Information Center, Saint Louis, Missouri, 1968-70; 4 sheets (partial coverage); scale: 1:250,000.

### Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Baie Ver*, the name of a cove, is listed as *Ver*, *Baie*. Where part of the name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Diacritical marks occurring in names in New Hebrides are the acute accent ('), the grave accent (`), the circumflex (^), the dieresis ("), and the cedilla (,). They should be used with both capital and lowercase letters.

French particles in their various forms (*de, d', du, des, à, au, aux, le, la, l', les*) should begin with lowercase letters except when they occur as the first element in a name. All other words should begin with capital letters.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. Some of the features named in this gazetteer do not fit precisely into categories used to designate them and others could be designated in two or more ways.

ADMD	first-order administrative division ( <i>circonscription</i> )
ANCH	anchorage (place within a harbor or roadstead where ships may anchor)
AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BGHT	bight (open body of water forming a slight recession in a coastline)
BLDG	building (function not identified)
BSNU	undersea basin (depression of the sea floor more or less equidimensional in form and of variable extent)

BUTE	butte (small, isolated, usually flat-topped hill with steep sides)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)
CAVE	cave(s) (recess in a cliff facing the sea; formed by the action of waves and tidal currents)
CH	church, chapel
CHNM	marine channel(s) (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine water body)
CLF	cliff (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)
CMPM	military camp
COVE	cove (small bay)
CRTR	crater (generally circular central depression in a volcanic cone)
ENTR	entrance (opening from the sea into a lagoon, bay, or harbor)
ESTA	plantation (large, commercialized agricultural landholding with associated dwellings and other facilities, having unified ownership and management but requiring more than a one-family labor force, and specializing in a single tropical or sub-tropical cash crop)
FLL	waterfall
HBR	harbor (body of water providing shelter for ships)
HLDL	headland (conspicuously high piece of land jutting out into or fronting the sea)
HLLS	hills
INLT	inlet (small, narrow indentation in a coast)
ISL	island
ISLP	land-tied island (former island joined to the mainland by natural processes of deposition)
ISLS	islands
LCTY	locality (minor area or place of unspecified or

LGN	mixed character and indefinite boundaries) lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)	RF	reef(s) (offshore consolidated-rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)
LK	lake	RKSW	rocks in water
LKC	crater lake (lake in the crater of an extinct or inactive volcano)	RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
LKS	lakes	RUIN	ruin (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
MESA	mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides)	SCH	school
MSSN	mission	SDL	saddle (moderately lower place between two summits or other elevations on a ridge or mountain)
MT	mountain (landform with conspicuous relief, moderate to high elevation, and small summit area)	SEA	sea
NRWS	narrows (constricted part of a water body or connection between two water bodies; smaller than a strait)	SLP	slope (gradient on the side or end of a mountain or other relief feature, less steep than a cliff)
OCN	ocean	SMT	seamount (undersea mountain, the top rising 1,000 meters [or 500 fathoms] or more from the sea floor, and of limited extent across the summit)
PCLD	dependent political entity (condominium)	SPNG	spring
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)	SPUR	spur (short sloping ridge extending laterally from a mountain or other elevation)
PK	peak (separately named summit on a more extensive elevation)	STM	stream (river or other running fresh water body, perennial in all or a part of its course)
PLAT	plateau (small area of flat to rolling surface in a well-dissected upland region)	STMI	intermittent stream (stream, no part of which is indicated as perennial)
PLN	plain (landform of low relief, slope, and elevation)	TMPL	temple
PPL	populated place (town, village, settlement)	TRNU	undersea trench (a long, narrow and deep depression of the sea floor, with relatively steep sides)
PPLQ	abandoned village	TRGU	undersea trough (long depression of the sea floor, normally wider and shallower than a trench)
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)	VLC	volcano (orifice in the earth's surface through which mineral matter is or has been extruded or ejected in a liquid or gaseous state from within the earth, together with such associated or resultant features as fissures, vents, lava flows,
PT	point (relatively minor projection of land or its extremity into a water body)		
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)		
RDGU	undersea ridge (long, narrow elevation of the sea floor with steep sides and irregular topography)		

WTLD cones, craters, plugs, dikes, and crater lakes)  
wetland (marsh, swamp, or other poorly drained area with a mixture of tree and grass vegetation or with unspecified vegetation)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative division (*circonscription*) in which the place or feature is located as listed below:

- |       |                        |
|-------|------------------------|
| 92600 | New Hebrides (general) |
| 92601 | Efaté                  |
| 92602 | Malékoula              |
| 92603 | Santo                  |
| 92604 | Tanna                  |

The general number (92600) is used for features of the high sea, and also for topographic and hydrographic features that lie within two or more first-order administrative divisions.

#### Glossary of generic terms

The following non-English language terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other

normalized usages. The parenthetical abbreviation (M) designates Melanesian words; the remainder are French.

anse . . . . .	cove, inlet
baie . . . . .	bay, bight, cove, inlet
boutou (M) . . . . .	spur
canal . . . . .	marine channel
cap . . . . .	cape, point
cascade . . . . .	waterfall
chenal . . . . .	marine channel
circonscription . . . . .	first-order administrative division
colline . . . . .	hill, ridge
condominium . . . . .	dependent political entity
détroit . . . . .	marine channel
étang(s) . . . . .	lake(s)
grotte . . . . .	cave
île(s) . . . . .	island(s)
flot . . . . .	island
inwa (M) . . . . .	intermittent stream, stream
lac(s) . . . . .	lake(s)
marais . . . . .	lake
mine . . . . .	mine
mont(s) . . . . .	hill(s), mountain(s)
montagne . . . . .	mountains, spur
morne . . . . .	hill
motillage . . . . .	anchorage
natayava (M) . . . . .	bay, cove
nêtchan (M) . . . . .	point
nézoun (M) . . . . .	point
nézwon (M) . . . . .	hill(s), mountain, peak, spur
passage . . . . .	entrance
pasé . . . . .	marine channel
pic . . . . .	mountain, peak
plage . . . . .	beach
plaine . . . . .	plain
plantation . . . . .	plantation
pointe . . . . .	point

port . . . . . anchorage, port  
récif(s) . . . . . reef(s)  
rivière . . . . . stream  
rocher(s) . . . . . rock(s)in water  
rouisseau . . . . . intermittent stream  
sinio (M) . . . . . point  
tavani (M) . . . . . mountain  
vatu (M) . . . . . rock in water  
vouti (M) . . . . . hill, mountain, spur

wai (M) . . . . . intermittent stream, stream

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future editions by reporting errors to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition  
of the political status of an area by the United States Government.

**APPROVED FOR RELEASE: 2007/02/09: CIA-RDP01-00707R000100160004-7**

Created in 1849, the Department of the Interior – America's Department of Natural Resources – is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States – now and in the future.
